Art Unit:

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The present invention relates to a transmission electron microscope and, more, particularly, to a camera system for registering, in optical form, a photon image converted from the electron image. The prior art of record fails to anticipate or render obviousness of a transmission electron microscope comprising a housing and an electron beam generator on the housing directing an electron beam along a transmission electron microscopy path within the housing and a luminescent screen in the housing transverse to the path and insertable in the path for transforming an electron image into a photon image and an optical elements juxtaposed with the luminescent screen for rerouting the photon image through a right angle and a camera outside the housing in optical alignment with the optical element for registering the photon image and a focussing lens optics spaced apart from the optical element and the camera and in optical alignment with the optical element and the camera and a structure fixing the luminescent scene, the optical element, the camera and the focussing lens optics together for joint movement relative to the path as specified in an independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
